

Endorsement

Amidst pandemic crisis, last year students' fate who couldn't take the test was hanging in predicament as prospective employers' clause was to have the examination must be cleared before joining.

DigiProctor tool deployment was a boon for the future of our students. All the tests for the students were done on the 13th & 16th May 2020 with complete academic integrity & values as if done physically. Prior to actual test team at DigiProctor held the mock test on the 11th May 2020 which helped student understand the tool well & actual test went without any single call from the student which proved intuitive user interface of the tool.

Prior to signing-up with DigiProctor, Luxury Connect Business School was approached by many other solution providers but post validation we realized DigiProctor crosses all the milestones on Scalability, Reliability & Security features that no other tools we learnt about were even close to.

In addition the service provided the relationship manager (Jitender Kumar) was immaculate. Jitender along with his support team really made the transition from offline to online so smooth not only with the faculty members but with the students also. He left no stoned unturned to complete the project.

We wish DigiProctor and Jitender Kumar all the best for the future endeavors
